About Trade On Go

Trade On Go, an extension of Philip Capital, plays an intermediate between traders and investors by providing financial solutions related to discount brokerages. They help buyers and sellers to operate in stocks, mutual funds and other kinds of financial instruments at a low cost. The parent company's experience and reputation help the firm deliver the best financial services to customers.

Concept:

Here, we have cleverly included the initials of the name of the firm, that are T, O and G to have the viewer directly connect trading and broking with the company. You can clearly see 'T' and the formation of 'G' following it. The big loop represents 'O' and also shows a never-ending relationship between the firm and its customers.
